

ITC CONFERENCE GRANT SCIENTIFIC REPORT

This report is submitted for approval by the grant to the MC Chair.

Action number: CA16228 – European Network for Game Theory
Conference title: Cities’ Identity Through Architecture and Arts (CITAA) – 4th Editio
Conference start and end date: 14/12/2020 to 15/12/2020
Conference attendance start and end date: 14/12/2020 to 15/12/2020
Grantee name: Accosiate Prof. Dr. PARISA GÖKER

ACTIVITIES DURING YOUR ATTENDANCE AT THIS CONFERENCE:

-
Cities Identity Through Architecture and Arts (CITAA) – 4th Edition due to pandemic situation was held on 14-15 December 2020 in collaboration with University of Pisa, Italy. I have presented my research paper (Design of Sustainable Smart Bus Station: ase study of Bilecik, Turkey) in the 3th session of conference on 15th December. Conference was an interdisciplinary organization in the filed of architecture, art, history, cultural heritage, technology etc. so there were a lot of different studies under different topics (design, cities, architecture, heritage etc.). Each session was created with different themes such as; city formation and indentification, contemporary arts, city visual arts and visualization, regulation, integration and sustainability.

The conference started with the speech of Prof. Francesco Alberti (Conference Chair & Professor at the Department of Architecture (DiDA), University of Florence), Prof. Luca Lanini, (Associate Professor at DESTeC of University of Pisa), Prof. Rocco Rizzo (Full Professor & Director of (DESTeC) -Dept. of Energy and System Engineering, Centro Piaggio, University of Pisa). Participants from all over the World presented their latest research results, ideas, developments, and applications in their study area.

In the sessions I attended “Regulation, Integration and Sustainability”, some of the works were interesting. One of the presentations was about “The Future of Urban Living: Innovations in Co-living Spaces, İzmir-Turkey” and another interesting research was “Reforming significance of Historic buildings with Energy Efficiency Studies: A case study of Indo Saracenic buildings in Jaipur, Rajasthan”. In the same way, I explained the concept and design princiles of sustainable smart bus station. Also talked about process-based design contains the six step defined procedure as; -develop the design goals for producibility, - develop a plan for product and process, -set off design components for mountability, - redesign the elements taking the case of manufacturing in consideretaion and also apply optimization and adjust the design.

I mentioned on my presentation “This Research is supported by Cost CA16228 – European Network for Game Theory”.

IMPACT ON YOUR RESEARCH AND FUTURE COLLABORATIONS (if applicable)

After peer reviewing process, the full text will be publish in The International Journal of Academic Research Community Publication (ARChive) online by IEREK Press.

The conference organization was very successful. I had a great opportunity to meet and communicate online with different academicians from other countries and universities all around the world through this meeting. The experiences and knowledge that I have gained in this conference have formed the basis for my future researches. My major is Landscape Architecture, so in my future researches, I will prioritize making greener and more environmentally friendly designs with the contribution of technology within the framework of urban design.
